

CITRIC ACID

pH DOWN

A weak organic acid commonly used because of its granular form. Proper mixing can make solutions to lower the pH of the root zone in many different growing environments

JACK'S ELEMENTALS are designed for use in many aspects of the horticultural industry. **Jack's Citric Acid** is a technical grade natural fruit acid. It is weak organic acid, that is stronger than vinegar but weaker than any mineral acid. It is commonly used because of its granular powder form to make solutions that can lower the pH of the root zone in many different growing environments.

NET WT. 1 LB. (0.45KG)

CAS# 77-92-9

JR PETERS INC

MIXING TIPS

One ounce (by weight) is equivalent to 28.3 g OR 5.94 tsp.

One pound is equivalent to 1.98 cups

USE INSTRUCTIONS

This organic acid is relatively safe to use and should not react with fertilizer salts or pesticides.

To lower pH to approximately 5.8, use the table below.

Total Alkalinity (ppm CaCO ₃)	Total Alkalinity (meq, me/l)	Quantity of Citric Acid* to use per 100 gallons of water, final solution
25	0.5	0.182 Ounces
50	1.0	0.364
75	1.5	0.543 (1 Tablespoon)
100	2.0	0.728
125	2.5	0.91
150	3.0	1.092 (2 Tablespoons)
175	3.5	1.274
200	4.0	1.456
225	4.5	1.638
250	5.0	1.82 (1/4 Cup)
